Mediterranean network to Assess and upgrade the Monitoring and forecasting Activity in the region

MAMA
The First MedGOOS Project

Funded under the EC Programme, Environment and Sustainable Development, Vth Framework Programme

Welcome to the MAMA website

News on MAMA

- 3rd MAMA Meeting 1st, 2nd and 5th December 2002, ATHENS, Greece

The Mediterranean network to Assess and upgrade Monitoring and forecasting Activity in the region (MAMA) is a 3-year EU-funded project, with a partnership from all the riparian countries, that aims to establish the multi-national network and regional platform for routine marine observations and forecasts in the Mediterranean

MAMA focuses on the trans-national pooling of scientific and technological resources in the basin, through the sharing of experiences and the transfer of expertise, to bring capacities in operational oceanography at comparable levels.

MAMA interacts with end-users, stakeholders and relevant international organisations, working in the whole basin to stimulate local awareness on the benefits of operational oceanography, disseminating results and demonstration products.

MAMA infos

- 60 web pages**
- more than 30 users**
- 100 links**
- Dedicated functions and database**
