

THE HEAT IS ON...

...young marine professionals join the great climate change debate

Can marine engineers and scientists help find a solution to climate change? Does the shipping industry have an important part to play in combating climate change? Should we be focussing our resources on battling climate change, or accept the inevitable and learn to adapt to it?

Young scientists and engineers will be given the chance to present their views during an afternoon of lively debate at the Pacem in Maribus XXXII Conference, Malta, Wednesday 7 November, 2007.

Decide what's hot...join the debate and make your voice heard

Organised by the Institute of Marine Engineering, Science and Technology (IMarEST) as part of the Pacem in Maribus XXXII – Women, Youth and the Sea Conference.
